

Quarterly Security Report

Prepared by the Information Security Team

Executive Summary

This report summarizes the security posture for Q2 2026. Overall risk levels remain moderate with several areas requiring attention. Key metrics show improvement in patch compliance and incident response times.

Key Findings

1. Patch compliance improved from 78% to 92% across all systems.
2. Mean time to detect (MTTD) decreased by 15% to 4.2 hours.
3. Zero critical vulnerabilities remain unpatched beyond SLA.
4. Employee phishing click rate decreased from 12% to 7%.

Recommendations

1. Implement network segmentation for legacy systems.
2. Deploy EDR agents on remaining 8% of endpoints.
3. Conduct quarterly red team exercises.
4. Review and update incident response playbooks.
